

# Gobbelet

Set 3 stacks of pieces for each player near the board

**On your turn do ONE of:**

- 1) Place the top piece from a stack onto an empty space**
- 2) Move one piece on the board to an empty space or on top of another piece on the board**  
You can take the top piece off a square on the board and place it elsewhere, but the piece you uncover is in play, even if it is your opponent's.
- 3) If your opponent has 3 in a row, you can move the top piece from a stack to cover 1 of those 3.**

You can cover any size piece with any larger piece  
(You don't have to use the next larger size).

**4 in a row wins!**
